

POLICE FORCE IS CUT TO 15 MEMBERS

Economy Order Puts Freese Out of Service—Changes in Work.

Patrolman Walter Freese has been released from service on the police department, cutting the force to 14 men and one woman, it was announced by Chief Charles Newman Monday. It is believed the order to dismiss one man came from those in charge of the city government as a move to cut down municipal expenses for 1922. Being the newest man on the force, having served about six months, Freese was naturally the first to be affected by the order for more economy.

"Freese is a good policeman and did a lot of good work during his short term of service," said Chief Newman, "but he was the last man on staff to be first off."

The force today numbers 14 including the chief but will jump to 15 on Feb. 1 when Lennartz returns to service after a 30-day suspension.

With the departure of Freese, several changes have been made in the beats. Capt. Peter D. Champion, who has been attached to head quarters the past month, takes the day relief, succeeded Con. O'Leary, who has been assigned to night relief duty in place of Joseph Myers.

This leaves five men on duty days, and six on duty nights, as follows:

Days—August Sorstad, east side beat; James Ward, middle; Charles Harmon, Academy street; Charles Dickinson, desk sergeant; Capt. Champion, relief.

The chief and other two members of the force, Miss Margaret Kavanaugh, policewoman, and Clinton Case, motorcycle patrolman, are on duty at various hours.

"I believe we can get along all right with the 14 men," said Chief Newman. "I didn't think so last fall because I thought we were going to have a hard winter. So far we have been fortunate in having little trouble. I believe this is due to a large extent to the open water."

WHY BURN ZIEGLER, COAL?

No soot, no dirt, no rock, no clinker, few ashes. Lots of heat. A coal that anyone can burn. One ton will convince you. Sold only by Brittingham & Nixon. Phone 117.

Lauds Potato Standardizing in Wisconsin

(By Associated Press.)

Madison—Standardization of Wisconsin potatoes by the state department of markets has resulted in a gain of at least \$100,000 to the economy of the state this year, L. G. Foster, deputy commissioner of markets, said Tuesday. As a result of grading he declared, the price of the 16,000 cars of Wisconsin potatoes ranged 15 cents per 100 pounds higher than those from other states.

This state, by taking the lead in establishment of definite grades on farm products, is building a reputation that can be capitalized by the farmers, Mr. Foster believes. The farmer with high grade products will be rewarded by increased prices he will be obtain for them on the markets.

The first season of compulsory standardization has resulted in removal of practically all objection first raised by potato shippers, according to Mr. Foster, who says that the attitude of the market who objected was changed when they learned that they would receive increased prices for their products.

Cheese grades are to go into effect February 12. The department order means that half of the nation's cheese must be inspected and graded under the requirements of the state law.

Only by such inspection and grading can the standard of Wisconsin's products be raised and quality be rewarded, Mr. Foster says. Development as far as possible will depend more and more on standardization of products, in his opinion. Wisconsin, he says, is taking the lead among states of the nation, and will be the first to benefit.

Notice

The Annual Meeting of the Rock County Tobacco Growers Assn. will be held at the De Forest Warehouse, Saturday, Jan. 21, at 1:30 P. M. W. R. FEMBERT, Secy.

Will Pledge Support for Deep Waterway

(By Associated Press.)

Madison—The support of Wisconsin to the proposal calling for construction of the Great Lakes-St. Lawrence deep waterway project will be pledged by hundreds of delegates representing cities and agricultural and commercial interests who will meet her Wednesday.

Governor Elaine will open the meeting with an address of welcome. He will be followed by speakers who will stress the importance of the project to Wisconsin and the middle west.

The purpose of the meeting is to pledge support of the state to its congressional delegation connected to be among the leaders in the house and senate for acceptance of the project. Resolutions will be passed endorsing any action the state's representatives may take to promote early action by congress.

The program for Wednesday calls for talks on all phases of the proposed waterway by speakers who have studied the project and its probable effect on Wisconsin.

NEWHOUSE WITH RECEIVERS

W. O. Newhouse, formerly with the Gold-Stack company of Minneapolis at the Janesville office, has been retained by the receivers of that company to handle the business of collections.

VELVET JOE ALMANAC

Velvet Joe's almanac is out again and as usual is one of the best. It is crammed full of information and is published by Liggett & Myers Co.

VOICE OF THE PEOPLE

Editor Gazette:

I want to thank you for the editorials in the Gazette. It seems to me the women should read them now that they have the ballot. It seems the woman should know how the candidates in the next election stand before they vote. A candidate should certainly declare his attitude on the eighteenth amendment and whether he will vote for a memorial to congress to repeal the Volstead law or not.

Since the passing of the amendment, women are handling the ballot which they have never had that privilege before. And we do not believe that any woman with a pay check in one hand, and a ballot in the other, is going to use the ballot to destroy the check. If she knows what she is doing. And let us hope and pray we may know beyond a question of a doubt when it comes time to use that ballot.

There are plenty of reliable sources these days where correct information may be had on where candidates have stood in the past, and where they expect to stand in the future.

A WOMAN VOTER.

War Vets from Other Cities Boost "Follies"

Rehearsals for the American Legion Follies of 1922 began in earnest Monday night with one for the entire chorus. Through the courtesy of the Moose and Elks, rehearsals will now be held in their club rooms in the Myers theatre block.

Interest in the show has already extended beyond Janesville and the Richardsons expect to see a great many of all other posts in the state of Wisconsin. Tentative arrangements call for the opening night as "American Legion night." Rehearsals from Rockford, Beloit, Whitewater, Mt. Atkinson, Evansville, Edgerton, Milton, Delavan, Elkhorn, Footville, Oxfordville and Brodhead are expected to attend the first night in force and if possible as is possible.

"I believe we can get along all right with the 14 men," said Chief Newman. "I didn't think so last fall because I thought we were going to have a hard winter. So far we have been fortunate in having little trouble. I believe this is due to a large extent to the open water."

WILL IMPROVE POULTRY.

It has been found in Jefferson county that such a group of farmers can engage a man to run the machine and lay the necessary spray materials at an average cost of 20 cents per acre for the four sprays. A sprayer of this kind may be used for years, and has proved a good investment.

Richardson's suggestion is that the agricultural committee of the Legion Follies be given a special car over the Interurban road with the probability of a second car being attached at Beloit.

Robert (Bob) Sheehan, author and director of the Follies, is enthusiastic over the chorus that has been gathered by Dr. Irving Clark. "I have had a lot of work with professionals," he said, "and usually they are much easier to handle than amateurs, but these Janesville people want it is hard to believe they have not been in the business. This town is going to be a surprise. We're going to see a road show that would be a credit to Milwaukee or Chicago."

The Legion Follies are built on the lines of Ziegfeld's Follies. The entire cast is on the stage for the opening number and thereafter scenes follow scene in such rapid succession that there are no interruptions not time for encores. Only one interruption of ten minutes is allowed—time needed to give the orchestra music needed for the show. The Follies of 1922 have 15 big scenes, each with its own costumes, drops and props.

Proceeds of the show are to be used by the Richardsons post of Janesville in additional relief work for World War veterans and also the equipping and maintaining of club houses. The local post has more than 150 members. They have decided to make or break on this show and no effort will be spared to make it a go.

Whitewater

Whitewater—Mrs. Stewart Olson died Saturday in Milwaukee. Funeral services were held Sunday and the body was taken Monday to Alton, Ill., her former home. Interment will be made there.

PARENT-TEACHERS MEET

The Parent-Teachers' association will meet Tuesday night in the high school assembly room. Rev. Niel Hansen will speak on "Character Building."

GRADUATING HIGH SCHOOL STUDENTS

Prof. G. O. Gauding, Whitewater, gave the address at the community service Sunday night at the men's gymnasium at the normal school, attended by more than 250. B. Green was the soloist.

PERSONALS

A. C. Bloodgood and daughter Ruth, Aurora, Ill., spent the weekend at the F. R. Bloodgood home in Whitewater. Rev. A. C. Benjamin came Monday from Milwaukee to attend the funeral of George Chaffee—Charles Severson, Boileau and Ludwig Hood, Minneapolis, spent Sunday at the home of Mrs. Martin Reed—Mrs. Peter Klug, Milwaukee, was here to attend the funeral of George Chaffee—Mr. and Mrs. Clyde Smith and Miss Florence Tert. Deloit, spent Sunday with Mrs. Lillian Perry. S. Beaton, Rockford, who had been spending the last month with his daughter, Mrs. W. P. Roseman and family, returned to his home Monday.

WHITEWATER TAKEN AS PAROLE VIOLATOR

(Special to the Gazette)

EDGERTON—Adolph Gunness, veteran of the thirty-second division, was brought back to Edgerton Saturday night from Spain, having served 18 months. He deserted his wife and children. He was arrested and released on parole on his promise to go to work. He later disappeared. Gunness was given a hearing before Justice D. W. North Monday and bound over to the Rock county municipal court, Janesville. He will appear before Judge Maxwell at 9 a. m. Tuesday.

TEACHER KNOCKED DOWN BY AUTO

Elkhorn—Miss Emma Jacobson, supervising teacher, was knocked down and run over by a fast automobile on Sunday evening. She was rolled along under the machine for some distance, but fortunately escaped being run over by the wheels.

Miss Jacobson was taken to her home in a bruised condition, but no bones were broken.

THE FIRST CIRCUIT RIDER

Judge George Grimm recalled a few days ago that there was the first of precedent in the circuit rider, and the first one was Samuel who according to the book of Samuel judged Israel all the days of his life, and went from year to year in circuit to do it.

COMEDIAN IS DEAD

New York—Several hundred men and women cheered the mention of Woodrow Wilson at the opening of the campaign for \$1,000,000 by the Woodrow Wilson foundation.

NEW YORK—Striking employees of six meat packing plants found their places filled when they tried to return to work.

PARIS—Premier Poincaré took steps to straighten out points in the Anglo-French pact, as agreed to by M. Briand and Mr. Lloyd George, and to which M. Briand officially greeted M. Gen. Harry T. Allen and American soldiers at the Swiss frontier on their way to Rome to honor Italy's "unknown own soldier."

London—The war office has announced evacuation of southern Ireland will commence forthwith.

DALLAS, TEX.—Dr. J. N. Institute, before Public Health Institute, declared there are more than 400,000 people in the United States.

WALWORTH COUNTY PLANS FARM WORK

Betterment of Dairy, Orchard and Poultry Industries Urged.

(SPECIAL TO THE GAZETTE)

ELKHORN—An outline of the work which will be undertaken this year by County Agent L. J. Merriman was made by the Walworth county agricultural committee, which met at the court house here last week. This committee is composed of A. B. Smith, Lake Geneva; George John C. Larson, Walworth County Superintendent of Schools; Helen Martin; M. E. Cusack, Darien, and Ralph Tratt, Whitewater. Mr. Cusack and Mr. Tratt were selected from the farmers of the county by the county board.

The work which Mr. Merriman will undertake includes the encouragement of alfalfa growing, organization and promotion of cow testing associations, orchard spraying and pruning.

The encouragement of alfalfa growing is the first to be added to the soil to correct the acidity, it was declared, and soil testing must be done to determine the amount to be applied.

CONTINUE TESTING WORK.

Cow testing organizations will be continued, the aim being eventually to have an organization in each township. Mr. Merriman also will devote part of his time to seeing that the present associations are giving all the service possible and to have the county testers extend their assistance to the farmers along other lines than now required of them. They would be of especial help in the care of orchards, small fruits and poultry.

Orchard spraying and pruning will be given more time than has been in the past. By the use of the spraying rings, it is hoped to do more efficient work in the farm orchards. This will be a new movement in Walworth county. The idea is for farmers to club together and buy an efficient spraying outfit. This will necessitate an investment of about \$35.

WILL IMPROVE POULTRY.

It has been found in Jefferson county that such a group of farmers can engage a man to run the machine and lay the necessary spray materials at an average cost of 20 cents per acre for the four sprays. A sprayer of this kind may be used for years, and has proved a good investment.

THE SOCIAL CHRONICLE

SOCIAL EVENTS

TUESDAY, JAN. 17.

F. A. U. B. Hard Times party.
Ruth's Circle annual banquet.
Congregational Plymouth Guild.
Wesley Circle at Gitchell home.
St. Paul's Y. P. S.
Colonial Club dance.

WEDNESDAY, JAN. 18.

Afternoon.
Baptist Ladies Aid.
King's Daughters Silver tea.
W. C. T. U.—Mrs. Loudon.
Eastern Star study class.
Congregational Woman's club.
Congregational Girls' club.

Evening.
Rex Dance.
D. Y. C. club.
Drama club at Janesville Center.

At Church Wednesday.—The Congregational Girls' club will meet in the church parlor at 4 p.m. Wednesday.

Perleberg Surprised.—Mr. and Mrs. William Perleberg, 358 Western avenue, were surprised by 15 friends Sunday night, in honor of the Mrs. Perleberg's birthday. The evening was spent in games and dancing. At midnight a three-course supper was served.

Entertainment for Daughters.—Mr. and Mrs. William Lenz, 13 North Main street, entertained Sunday in honor of their two daughters, Loraine and Lillian. The guests arrived at two o'clock and spent the afternoon playing various games. A three-course supper was served in the cafe at 5:30. Those who attended were Misses Louise Miller, Florence Schmitz, Margaret Gode, Lydia Jaeger, Ruth Jaeger, Emma Luedke, Esther Eichm, Esther Westerhoff, Clara Davier, Helen Luek, Ruth Thom, Louise Kronitz and Lillian Crisbeam.

Women to Meet.—The U. B. Ladies' Aid Society will meet in the parlors of the church Thursday afternoon. Members are asked to bring sandwiches and a dish to pass.

To Have Social.—The Young People's Society of the St. Paul's Lutheran church will meet in the school rooms Tuesday night for a hard times party. A program will be given.

Dean Ryan Talks.—Members of the Young Ladies' Society of St. Patrick's church met in the school hall Monday night. Dean J. F. Ryan gave a short talk followed by a program and refreshments.

Has Monday Dinner.—Mrs. Henry Cullen, 308 Chestnut street, entertained at a seven o'clock dinner Monday night, covers being laid for 10. It was in honor of the Misses Guckeen Rochester, Minn., who are visiting in the city for a few days.

Postpone Meeting.—The evening club, which was to have met with Mr. and Mrs. C. E. Parker, Racine street, will not meet for a few weeks, due to the illness of several of the members.

Fountain Entertains.—Mr. and Mrs. John Fountain, 709 South East street, entertained at a dinner-bridge party Monday night, complimentary to Mrs. M. L. Fountain, Chicago, mother of Mr. Fountain, who is a guest for a few weeks. At cards the prizes were taken by Mrs. M. L. Fountain, Mrs. J. H. McVicar and Dr. W. H. McCullough.

Leave for Florida.—Mr. and Mrs. William Pond, Milton avenue, have left for Florida, where they will visit their son, Edward, at Grant, Fla. in business there. Mr. and Mrs. Pond will also visit other points of interest in that state, to stay at their residence in the future. Mr. and Mrs. Pond will be greatly missed in this city, where they spent the greater part of their married life. Mr. Pond was recently connected with the C. P. Beer's insurance firm.

D. Y. B. Club Wednesday.—Members of the D. Y. B. club of the Presbyterian church will meet Wednesday night for their regular meeting. Supper will be served at 6:15 by Misses Ethel Nathman, Hazel Hill and Mildred McBride.

Initiate Pledges.—Initiation of freshman pledges of the Theta Pi Gamma sorority, Beloit college and celebration of the granting of its national charter was held by the sorority at the Presbyterian church, Beloit, last Saturday night. Among the pledges who were guests of honor were Misses Elizabeth Sayles and Margaret Alter, both of the city; Elizabeth Sayles, Mrs. Carroll, Ill., and Elizabeth Foster, Beloit, both frequently visited in this city.

Among the out-of-town alumni present was Mrs. Louise Ritsche Cunningham, wife of Gerald Cunningham, Forest Park, boulevard, this city.

With Mrs. Loudon.—The W. C. T. U. will have its regular meeting at the home of Mrs. Amelia Loudon, 212 North Washington street, at 2:30 Wednesday afternoon. A special feature will be a talk on "Child Welfare" by Miss Alice Glenn, Red Cross nurse and exercises by a class of boys on the 18th amendment. Members are asked to bring needles and thimbles for sewing.

Live Wives Meet.—A Live Wire group met at the home of Edward Karberg, 200 North Faust street, Monday night, for a half-hour of study. This was followed by a social hour.

Miss Britt Entertained.—Miss Ross W. Britt, North High street, was the guest of honor at a party given Saturday night at the home of Mr. and Mrs. Robert F. Buges, 512 South Academy street. Miss Britt left Monday for Los Angeles to spend the rest of the winter. Table decorations were various flowers and a gift given to Miss Britt. Among the guests were Mr. and Mrs. C. E. Ash, A. C. Hager, Helen Morley, Florence Britt, Maude Baumann, Mr. and Mrs. Fred McGill, William C. Deaneen, Mr. and Mrs. Frank Osborne, Agnes Tracey and Gladys Graves.

Luncheon Thursday.—Mrs. Ann Teeker and Mrs. Cleo Fairman have given out invitations for a luncheon for Thursday at the Colonial club.

Drama Club Wednesday.—The regular meeting of the Drama Club will be held at Janesville Center at 7:30 Wednesday night.

Program and Supper.—The Eastern Star study class will meet in Masonic Temple Wednesday afternoon. It will be "Eastern Star" day and supper will be given, followed by a supper served at 6 o'clock. The hostesses will be Nedades Louis, Amerpohl, C. F. Korch, Roy Gesteland, C. F. Garst and James Shearer.

Luncheon at Colonial.—The Art League will meet Friday noon at the Colonial club. A luncheon will be served at one o'clock. The reception committee to consist of Mrs. M. G. W. Nuzum, chairman, Mrs. M. G. Pierce, Mrs. Henry Tull, Mrs. H. M. Dredick, Mrs. E. D. McGowan, Mrs. Edward Shubert and Mrs. Frank Slawinski. Eighty reservations have been made. A social afternoon will be spent.

Form L. W. Groups.—The Presbyterian church has formed four Live Wire groups to include a membership of all boys of the church and Sunday school. Meetings will be held weekly, at which time Bible study and some subjects interesting to boys will be taken up. The four leaders are B. J. Jackson, Rev. J. A. Melrose, Robert Bark and Don McFarlane. The boys work of the church, under the supervision of P. F. Korch, Sup't. P. O. Holt and A. E. Burgham.

Woman's Club Wednesday.—The Woman's Club of the Congregational church will meet at 8:30 Wednesday afternoon.

Perleberg Surprised.—Mr. and Mrs. William Perleberg, 358 Western avenue, were surprised by 15 friends Sunday night, in honor of the Mrs. Perleberg's birthday. The evening was spent in games and dancing. At midnight a three-course supper was served.

Miss Britt Entertained.—Miss Ross W. Britt, North High street, was the guest of honor at a party given Saturday night at the home of Mr. and Mrs. Robert F. Buges, 512 South Academy street. Miss Britt left Monday for Los Angeles to spend the rest of the winter. Table decorations were various flowers and a gift given to Miss Britt. Among the guests were Mr. and Mrs. C. E. Ash, A. C. Hager, Helen Morley, Florence Britt, Maude Baumann, Mr. and Mrs. Fred McGill, William C. Deaneen, Mr. and Mrs. Frank Osborne, Agnes Tracey and Gladys Graves.

Luncheon Thursday.—Mrs. Ann Teeker and Mrs. Cleo Fairman have given out invitations for a luncheon for Thursday at the Colonial club.

Drama Club Wednesday.—The regular meeting of the Drama Club will be held at Janesville Center at 7:30 Wednesday night.

Program and Supper.—The Eastern Star study class will meet in Masonic Temple Wednesday afternoon. It will be "Eastern Star" day and supper will be given, followed by a supper served at 6 o'clock. The hostesses will be Nedades Louis, Amerpohl, C. F. Korch, Roy Gesteland, C. F. Garst and James Shearer.

Luncheon at Colonial.—The Art League will meet Friday noon at the Colonial club. A luncheon will be served at one o'clock. The reception committee to consist of Mrs. M. G. W. Nuzum, chairman, Mrs. M. G. Pierce, Mrs. Henry Tull, Mrs. H. M. Dredick, Mrs. E. D. McGowan, Mrs. Edward Shubert and Mrs. Frank Slawinski. Eighty reservations have been made. A social afternoon will be spent.

Form L. W. Groups.—The Presbyterian church has formed four Live Wire groups to include a membership of all boys of the church and Sunday school. Meetings will be held weekly, at which time Bible study and some subjects interesting to boys will be taken up. The four leaders are B. J. Jackson, Rev. J. A. Melrose, Robert Bark and Don McFarlane. The boys work of the church, under the supervision of P. F. Korch, Sup't. P. O. Holt and A. E. Burgham.

Woman's Club Wednesday.—The Woman's Club of the Congregational church will meet at 8:30 Wednesday afternoon.

Perleberg Surprised.—Mr. and Mrs. William Perleberg, 358 Western avenue, were surprised by 15 friends Sunday night, in honor of the Mrs. Perleberg's birthday. The evening was spent in games and dancing. At midnight a three-course supper was served.

Entertainment for Daughters.—Mr. and Mrs. William Lenz, 13 North Main street, entertained Sunday in honor of their two daughters, Loraine and Lillian. The guests arrived at two o'clock and spent the afternoon playing various games. A three-course supper was served in the cafe at 5:30. Those who attended were Misses Louise Miller, Florence Schmitz, Margaret Gode, Lydia Jaeger, Ruth Jaeger, Emma Luedke, Esther Eichm, Esther Westerhoff, Clara Davier, Helen Luek, Ruth Thom, Louise Kronitz and Lillian Crisbeam.

Women to Meet.—The U. B. Ladies' Aid Society will meet in the parlors of the church Thursday afternoon. Members are asked to bring sandwiches and a dish to pass.

To Have Social.—The Young People's Society of the St. Paul's Lutheran church will meet in the school rooms Tuesday night for a hard times party. A program will be given.

Dean Ryan Talks.—Members of the Young Ladies' Society of St. Patrick's church met in the school hall Monday night. Dean J. F. Ryan gave a short talk followed by a program and refreshments.

Has Monday Dinner.—Mrs. Henry Cullen, 308 Chestnut street, entertained at a seven o'clock dinner Monday night, covers being laid for 10. It was in honor of the Misses Guckeen Rochester, Minn., who are visiting in the city for a few days.

Postpone Meeting.—The evening club, which was to have met with Mr. and Mrs. C. E. Parker, Racine street, will not meet for a few weeks, due to the illness of several of the members.

Fountain Entertains.—Mr. and Mrs. John Fountain, 709 South East street, entertained at a dinner-bridge party

R. F. Bs. Drop Again--Blues Play Monticello Tuesday

SPEEDY WORK OF BROOKLYN TIGERS WINS, 29 TO 16

Once more up against a team that was far too good for them, the R. F. Bs. team of this city went down to defeat before the Brooklyn Tigers at the Coliseum rink Monday night, 29 to 16. Only a fair crowd greeted the team and most of them were from Brooklyn.

Brooklyn played a smooth and organized game, while the locals were rugged, with short passing offensive in all cases and lateral work, plus a strong defense, kept the Janesville team from getting to their basket more than three times in the first period and only five times in the inter half.

Although the Dower city club got the first basket, the Tigers started to stiff work early in the opening minutes. The strong work of the visitors took off steadily and fed the ball down the floor to a station my forward while the guarding of the R. F. Bs. players was tight.

Raubacher Stars
For 10 minutes in the second half, after Hager had been taken out, the locals showed a classy game. They kept the ball constantly in their possession and made it impossible for Brooklyn to score while they themselves took up three scores. Then Doug was taken out and Hager sent in. Immediately, Janesville went to pieces.

Raubacher starred for Janesville, playing a flashy all-around game. In six seconds in the second half, he made two field goals.

The game was somewhat dull until a few minutes before the end. A red-sore and wild dash for basket took place with each side getting its piece.

It is probable that the R. F. Bs. will take a two-weeks' road trip.

The lineup and score:

| Brooklyn | R. F. Bs. | (16) |
|--------------------------------|-----------|------|
| 1. Lyon, Ig. | 10 | 10 |
| 2. E. Johnson | 10 | 10 |
| 3. Raubacher | 10 | 10 |
| 4. Wackmann, c. | 11 | 11 |
| 5. Bond, Jr. | 10 | 10 |
| 6. Wackmann, R. | 20 | 0 |
| 7. McVane | 10 | 0 |
| 8. Hager | 12 | 0 |
| 9. Raubacher | 10 | 0 |

| The Hub | 24 | 18 | .571 |
| London Hotels | 24 | 18 | .571 |
| West Side | 10 | 32 | .231 |

Reversing their performance of last week, the London Hotels took three games straight in the Tri-league at the West Side alleys Monday night. They defeated The Hub, despite the fact that the latter carried a "Custer Whistle" with a total of \$18 made in 202-204. As a result of this game, the Bakers held tight to first place by defeating the West Side five times straight.

MAY BOOST FAIR CAPITAL \$25,000

Would Increase to Provide Pavilion Funds—Meeting Jan. 26.

Advisability of increasing the capital stock of the Janesville fair association from \$50,000 to \$75,000 will be taken up at the annual meeting to be held at the city hall Thursday, Jan. 26, at 7:30 p. m.

The purpose of the increased capitalization is to join with the Rock county livestock breeders in erecting a stock pavilion at the fair grounds.

Two directors are to be elected for terms of three years each to succeed Frank P. Crook and Thornton Read, whose terms expire. Reports of the officers will be heard. Stockholders have been notified of the meeting by Secretary Harry O. Nowlan.

Three Directors Are Reelected

Frank H. Jackman, O. S. Morse and George A. Jacobs were reelected directors of the Janesville Building & Loan association for terms of three years each at the annual meeting of the body held at the Chamber of Commerce Monday night. Reports of the officers and schedule committee were read and accepted. A meeting of the board will be held this week to elect officers.

DRY LAW VIOLATOR GETS NINE MONTHS; MUST STAY IN JAIL

Beloit—Pending guilty to violation of the liquor laws, Dee Curry, colored, was sentenced to serve nine months in the county jail at Janesville by Judge John B. Clark.

Judge Clark ordered that the prisoner be confined in the jail every night and Sunday during his sentence. This makes it impossible for county officials to release the man under the minimum act, except for work that can be done during the day and near the jail.

Mike Boyle, sentenced to 90 days in jail and released after he had spent a week there, returning home, was ordered taken back to jail to serve his sentence, with the same provision as Curry.

WILSON LECTURES ON NEW INVESTMENT PLAN STARTED HERE

Explanation of the purposes and plans of the Community Investment Corporation of Janesville, John W. Dady, temporary president, was given by Lucius E. Wilson, originator of the idea, in a lecture at the Hotel A. Monday night. The meeting was attended by 23 stockholders and friends of the Bank of Southern Wisconsin.

Declaring the new method is based upon the theory that saving is a habit and the average American is not a saver and cannot be scared into thrifty ways, Mr. Wilson states that the corporation will give the small investor an opportunity to increase his holdings and provides a plan of investment, savings and insurance.

The insurance feature is to insure the savings and investment features. The savings is to provide a liquid fund. The investment feature is the attractive side, he declared, enabling a higher return than through ordinary means.

POSTAL DEPT. ALLOWS SEALING OF PARCELS

Under a recent ruling of the post office department, parcel post shipments may be sealed providing a printed label is attached giving permission to open the package if necessary and containing a general description of the material enclosed. This information was given out by the traffic bureau of the local Chamber of Commerce.

The following is suggested as a suitable form of label:

Contents _____ Postmaster: This parcel may be opened for postal inspection if necessary. Signed _____

Auto tourist camp large enough and attractive enough to care for the thousands who will visit Wisconsin during the summer of 1922.

Building every energy to finish the high school building so it may be used before the end of 1922. With the completion the problem of a community center will be solved.

Janesville's media and industrial and hotel facilities are open to the public. That will be especially true when the high school is completed and the auditorium is available for the largest conventions.

Finish the paving of Janesville streets as soon as the weather is fit, the necessary roads in taxation so as not to place a heavy burden on the people.

Give the city management its municipal affairs. Establish the city manager system of government as an efficient and efficient. Give the city a park. There is now available \$10,000 for this purpose and it should not be used for any other. Finish the city and zoning plan.

Memorial Building for World war soldiers, the living and the dead—to be also an historical building.

WHAT CITY MANAGEMENT ACCOMPLISHES.

One of the difficulties of government of cities under the aldermanic and commission form is that the governing forces constantly attempt to tell the people what to do.

The city manager does what the people tell him to do.

City management puts one captain in charge of the ship—not half a dozen.

City management is the most popular kind of government for it does not tie the public to any manager longer than his efficiency warrants.

No day of mourning has been set apart in America for Kemal Pasha.

NOT A THING FOR AMERICA

A decided effort is being made to permit the members of the president's cabinet seats on the floor of the senate and to participate in the debates, though they would not be allowed a vote.

It is to be hoped that such a law will not be passed. It is un-American and not at all in keeping with the basic governmental traditions of the republic. When the constitution was adopted, the question of a ministry similar to that of England was debated. It was also rejected as not being fitted to the new republic. Instead of placing the power of government in a ministry, a real executive department was created with the president serving a definitely defined term of office, its chief. The members of the cabinet were not ministers at all but bureau heads for the transaction of business, with no voice in the legislative branch of the government.

It was a part of the plan to severely divide the legislative from the executive functions. Other republics since, as well as limited constitutional monarchies, have adopted the English plan. The result is a constant ministerial crisis impending in all of them. In France we have the statement of M. Briand that ministerial government is a failure and the very foundations of the French republic have been shaken. England and that means Britain is governed by a coalition of parties. In America, the very preservation of the governmental system is dependent on the complete separation of the executive, judicial, and legislative branches. Encroachments on them are encroachments on the constitution. The error in understanding as to the membership of the cabinet seems to be that we overlook the fact that each member is but a secretary and as such is a part of the executive department. Seating secretaries on the floor of the house or senate will add nothing to their powers except to make dictation of legislation by the executive department possible—a thing the fathers of the republic sought earnestly to avoid.

In order that the French republic may be preserved from anarchy and the proletarian revolution it may be necessary for it to adopt the American system of secretaries with definitely determined terms of service. This would avoid the volatile fickleness of the populace, so much a mark of French governments prior to the war and repeated since.

New York wants to know where it gets off on the deep waterway. The location is entirely immaterial.

MILWAUKEE'S POSITION

Having discovered the trail of the whiskey ring and it being thoroughly cowed, Milwaukee will soon have a large part of its population in jail. Prohibition is far from a failure when it finds men using thousands of dollars to bribe officials, bankers, and agents sworn to do their duty, aiding the bootlegger and supposedly decent citizens winking at or participating in crime. A man with a pocket full of bribe money standing on the street corner and saying in a loud voice that prohibition is a failure, is not very conclusive of an argument. You will find that the man who is advocating a return to the old conditions is receiving from some source a generous lot of consideration from the blood-sucking business of whiskey making or selling.

It is a source of general satisfaction to know that those two great benefactors of the world, Lenin and Trotsky, will not starve.

Henry Ford thinks we ought to issue flat money enough to pay off the national debt. Russia has done this and it takes 40,000 paper rubles to pay for one copy of a newspaper. At that rate it would take about 45,000,000 rubles to pay for a Ford, or at the old rate of exchange about \$12,000,000. That's fine; every man a millionaire, pocket books wiped out and trucks used for carrying money.

Having left a lot of fatherless children on the

FLYING LIKE A BUZZARD

BY FREDERIC J. HASKIN

New York.—That man will soon become a flying animal, able to soar in the air like an eagle without the aid of a motor, is the latest dramatic forecast of aeronautical experts. Successful short flights in motorless planes have recently been made by German aviators, while both European and American inventors are known to be at work on models of intricately-shaped wings more nearly resembling those of the large, soaring birds.

This was the dream of men centuries before the age of motors, and most of the early experiments in flying were but clumsy attempts to imitate the motion of birds. Leonardo da Vinci, for example, was convinced that if he could only produce a man-size pair of wings exactly like the eagle's, he would be able to fly just as easily as that bird. He had drawn many an eagle and he knew the peculiar shape of their wings, so eventually he produced a huge and accurately shaped pair. But something seemed to be lacking. The young inventor tried them out again and again, using his arms and legs to motivate them, yet he did not rise grandly into the air, as he had expected, and once he came down very abruptly indeed from the top of a low hill.

In a very short time he tired of these awkward experiments and turned to the fashioning of a "helicopter"—a great aerial screw, 95 feet long, and then he built another flying machine that was a framed sail. After that he died. Now modern aeronautical experts tell us that if Da Vinci had only gone on studying the wings and the flight of the eagle, instead of wasting so much time on his helicopter, he might have discovered the secret that modern scientists are beginning to know.

"Man is essentially a land animal," says one aviation authority, "and it is quite possible that Nature had not placed before him numerous examples of birds and insects that are able to fly; he would never have thought of attempting it himself. But birds are very much in evidence, and mankind has from the earliest times felt inspired to imitate them."

Nature has made a flying machine in the bird; which is nearly a thousand times as heavy as the air its bulk displaces.

If you will observe the flight of hawks or eagles, you will see that they seem to glide through the air with hardly any movement of their wings. Sometimes, however, they stop and hold themselves in a stationary position directly over a certain spot, carefully watching something in the earth immediately below. In such cases they often work their wings with great rapidity, evidently expending an enormous amount of energy. When they cease to hover and commence to move again through the air, they appear to keep themselves at the same height with an almost imperceptible expenditure of power."

In the nineteenth century the secret of this eccentric mode of flight was discovered. It was, men realized, the wind. Professor Langley was aware of the soaring theory as far back as 1891, as is proved by his famous memoir, entitled "The Internal Work of the Wind," while in 1897 Mr. Chanute shed even further light on the mystery. He believed that the variations of the wind were the greatest difficulties to be encountered in flying—a fact which is now fully appreciated by aeronautical engineers.

According to the soaring theory, there are three kinds of movements in the air—a rising current of air, following the upward contour of the ground; a rising current of air over heated ground; hot air rising and cool air rushing down to take its place, and, lastly, the irregularities in the speed of horizontal winds, causing crowding of air continuously—which, in turn, causes air-puffs upward.

An illustration of this theory in practice is the recent flight of Herr Klemperer in Germany, which is explained in an article by Mr. Post.

Klemperer left from Wasserklippe, a hill 3,000 feet high, and landed near the town of Gersfeld, six miles away, which is 1,800 feet high. The duration of the flight was more than 15 minutes. The beginning of the flight was made into the wind, which was from west-northwest. The hills running nearly due north and south. Klemperer turned south, following the ridge of the hills. If he had tried to cross he would have been caught in the downward air current which naturally follows the downward slope of the ground. He did run into such a situation near a spur called Pfeilskopf, where a gorse ran through facing the wind. In order to get back to the previous up-current he retraced his tracks, soaring upward until he was high enough to cross the gorge safely. After this he continued up the valley stream through which he found a favorably rising current, until after he had been in the air for six minutes he had attained a height of 400 feet above his starting place.

"This was the highest altitude attained, for soon after he came out of the valley into flat, low country, the slope of the wind decreasing with that of the ground. Later on he came to other hills and round rising air currents following their slopes, and he quickly took advantage of these currents to gain back some of the altitude he had lost in the level country. To the west were still higher hills, but Klemperer refused to take advantage of the rising air currents because they would have brought him over high country and so reduced his gliding angle. Instead, he kept to the valley, some thousand feet lower, where he could glide for some distance farther than he could if he were forced to land up on the high country. Several times he would strike regions of descending air currents, and instead of merely passing through these, he would make a series of turns, circling about, losing a little altitude as he sailed away from the ridge but gaining more as he turned again toward the ridge.

"The route of Klemperer demonstrates that his flight was influenced by two things—by the direction of the wind and by the physical characteristics of the country. The normally horizontal wind being influenced by the underlying country, created upward and downward currents of air—and it is of these that Klemperer took advantage, just as the buzzard would do.

With the exception that it was motorless, nothing is said concerning the shape or character of the German aviator's plane, but it was doubtless of a type specially adapted for soaring flight. That the shape of the plane is an important consideration in soaring flight is indicated by the number of European inventors who are working on new models of wings. Among the few to develop what is believed to be an efficient motorless machine is Gustav Lillenthal, who declares that the mystery of a bird's soaring flight lies not only in the shape, thickness and curve of its wing, but also in the peculiar arched manner with the wing tip depressed, in which it holds its wing. "This results," according to Lillenthal, "in a strong reverse eddy being formed underneath the wing—an eddy which, sweeping from front to back, is deflected by the curving curve and made to sweep up again under the thick center part of the wing from back to front. Thus it acts as a natural propeller and drives the bird forward through the air."

The few experiments that have been made in soaring flight have evoked tremendous applause and interest. In aviation circles all over the world, it is the thrilling subject of conversation. All authorities seem to agree that in this latest development the climax has been reached in aviation. Even the Wright brothers predicted that men would never stop with 300 horsepower motors, but would keep on studying and experimenting until they could fly with the same economy of power used by turkey buzzards.

French government doorsteps said take 'em or leave 'em or send them to an orphan asylum.

Having tossed the train wrecks off the car Ireland is proceeding in an orderly manner to make a government of its own.

JUST FOLKS

BY EDGAR A. GUEST

THE AVERAGE MAN

The papers overlooked him, for he never beat his wife. He never tried to rob a bank or take another's life. And he wasn't very brilliant and he didn't try for fame. So there was no real occasion for the press to print his name.

The papers overlooked him—he was never deep in debt. He never slipped away from town with all that he had got, never made a million, never wrote a modern play. So there was n't much about him for the editors to say.

He paid his yearly taxes just the same as you and I. He went to work o'mornings with twinkle in his eye. He kept a little garden, and his children seemed to grow. Into just the sort of children that the world is glad to know.

His friends were never many, but the few he had were true. For they had all discovered what the papers never knew: He was brave and clean and kindly—one of millions, I suppose. Whose lives are ordinary from beginning to the close.

And the more I think about him, it's the ordinary man.

With the glory of the nation and the strength of every clan. So I pay this tribute to him—not the genius or the crook. But the normal, average man the papers overlook.

The organist who plays the wedding march for Princess Mary and Viscount Lascelles will receive \$1,000. They could hire Sousa's band to do it jazz for that.

Who's Who Today

HON. W. L. MACKENZIE KING.

In the Hon. W. L. Mackenzie King, Liberal leader of Canada, whose recent victory at the polls means he heads the Dominion's new cabinet. The United

King has an understanding friend. King has spent a number of years in this country, where he finished his education. After studying at the University of Toronto, King went to Harvard, where he secured a Ph. D. degree. He was a fellow in political economy at the University of Chicago, 1890-91, and a fellow at Harvard during the three years following.

King returned to Canada in 1903, where for eight years he served as deputy minister of labor in the Canadian cabinet and the editor of the Labor Gazette. From 1908 until 1911 he served in the Canadian cabinet as a Liberal member from North Waterloo, Ontario. He was minister of labor in the Laurier cabinet, 1911-12, president of the Canadian Reformation Association from Ontario, 1912-14. He served as a mediator in important industrial strikes, and is the author of legislation in Canada on industrial disputes, investigation of combines and trusts, industrial training, and technical education.

King is the author of several publications, including "The Secret of Heroism," 1906, and "Industry and Humanity," 1918. He was born 47 years ago at Berlin, Ontario, and is unmarried.

SYNOPSIS
Thrown out of a job in his father's livery stable because of failure, George Morton becomes a huckster for Old Planter, rich and arrogant. The youth falls in love with Sylvia Planter, and when she falls from her horse, he kisses her. This brings on a fight. Morton leaves, goes to Princeton and determines on a college education. He makes the football team, studies with intense devotion, and the aid of a tutor, George Bally.

(Continued from Yesterday.) Another depressing thought made him leave company for Blodgett after his father had driven away. It came from a survey, showing his glimpse of Sylvia's beauty, of all the blantant magnificence with which Blodgett had surrounded himself. Blodgett, after dinner, a little flushed with wine, and the triumph of having had in his house on the same day two Sinclairs and two Planters, attempted an explanation.

"I didn't build this, Morton, or my place in town, just for Josiah Blodgett." George wasn't in a mood for subtleties of expression.

"I've often wondered why you haven't married. With your money you ought to make a big choice."

Blodgett stopped a moment. He smiled in a self-satisfied way.

"Money will buy about anything—even the kind of a wife you want. I'm in no hurry. When I find a young man, it will be the right kind."

And George understood that he meant by the right kind some popular and well-bred girl who would make the Blodgett family hit a social average.

He carried that terrifying thought of marriage back to Princeton. He had no fear Sylvia would ever look seriously in Blodgett's direction. Money could scarcely bribe her. This, however, was her second season. Of course, she would marry someone of her own immediate circle. She could take her choice. When that happened what would become of his determination and his boasts? Frequently he clenched her riding crop and swore:

"Nothing—not even that—can keep me from accomplishing what I've set out to do. I'll have my way with her."

He shrank, nevertheless, from the thought of her adopting such a defense. It was intolerable. He read the New York papers with growing suspense. As always, he attacked himself over his study of cause and effect in the Street. With football out of the way he could give a good deal of time to that, and Blodgett now and then enclosed a hint in Mundy's letters. It was possible to send a fair amount of money to his parents; but his mother's letters never varied from their formality of thanks and solicitations as to his health. His father didn't write at all. Of course, they couldn't understand what he was doing. The shadow of the great Planter remained perpetually over their little home.

Another doubt troubled George. With the club matter out of the way, and the presidency of the class his, and a full football curtain resting on his head, was he wasting his time at Princeton? The remembrance of Blodgett steadied him. "He needed all that Princeton and its companionships could give."

Purposely he avoided Betty. Was she, indeed, responsible for that softness he had yielded to in the infirmary, and during the final game? In his life, he kept nothing himself. There was no room for sentiment. Sentiment was childish, a hindrance. Hadn't he decided at the start that nothing should turn him from his attack for the summit? Still, he couldn't avoid seeing Betty now and then in Princeton, or at the dances in New York to which he went with Goodhue. The less he saw of Betty, moreover, the stronger grew his feeling of something essential lacking from his life; and it bothered that after a long separation, she was invariably friendly instead of reproachful. He found that he couldn't look at her eyes without hungrily trying to picture them wet with tears for him.

To some extent other demands took his mind from such problems. The rumpus Goodhue had foreseen developed. Important men came or wrote from New York or Philadelphia, in Dalrymple's name, but at the meetings of the section George sat obdurate, and when the struggle approached a crisis, Goodhue came out openly on the side of his roommate.

"You can have Dalrymple in the club," was George's ultimatum, "or you can have me, but you can't have us both."

If George resigned, Goodhue announced, he would follow. Dalrymple was doomed. The important men went back or ceased writing. Then Wandel slipped George into the

KITCHEN KINKS WORTH REMEMBERING

A cloth moistened with camphor will remove white spots from furniture.

Zinc should be cleaned with soap and salt, then polished with kerosene.

The most effective method of cleaning an iron is to dip it in a cloth wet with kerosene oil.

Rub the metal trimmings on stoves with kerosene oil and whitening, then polish with a dry cloth.

A little white sugar dissolved in hot water makes a good stiffening for delicate lace.

DRAWING LESSONS FOR OUR KIDDIES

Oh! How everybody hates "Sneak" the weasel. Farmer Jones hates him because he kills his chickens. All the animals of the forests and meadows, hate him because he will kill them just for the love of killing. If there is anybody who likes him it is the trapper and he wants "Sneak's" fur. For in the winter time he is snow white, except the tip of his tail which is black. In the winter time he is called "Ermine" but when spring comes and his coat turns reddish brown he is called just a common weasel.

Tinker Bob's Stories

by Carlyle H. Holcomb

MR. FISHER, OR PE KAN—THE TERROR

Silky, the silly monkey, was angry—so angry that he could have chewed the tail right off the King of the Forest. Silky liked the Choi, for Mr. Fisher always kept him supplied with the things which he used as toothpicks. An to have anything to happen to his friend, especially when he was minding his own business, was more than the friendly monkey could stand.

"I tell you to come over here and meet the King of the Forest."

"I don't want to see the King of the Forest," said the snarling fellow.

"I can't help what you want. Chief Porky didn't want you to hurt him, but that's the thing you want to do."

"Well, what were you trying to hurt Chief Porky for, then?"

"Well, you see my family was show-

ing tired of fish every day for breakfast, and I know how they like Mr. Porky's meat, so I thought I would try to please them once. But I will not do that again."

"No, I know if I had anything to say about it you would not do it again," said Silky.

"Well, I want to know more about you, Mr. Fisher," said Tinker Bob.

"I haven't any friends, in the forest, they all seem to be afraid of me."

"They have reason to be afraid of you. You killed my brother, and you will try to kill everyone who sees even me. But you could."

"That's Peepin' Morgan—when I was his private secretary we pulled off one of the biggest deals—etc."

"Gee!!"

BUT WHEN SOME GUY TRIES TO PULL THIS STUFF ON YOU—

"WHEN I HAD PASSED HIM, I LOOKED AT THE SPEEDOMETER, AND IT WAS EIGHTY ONE."

"???"

"WHAT ARE YOU TRYIN' TO HAND ME!!!"

"!!!"

IT'S AN INSULT TO YOUR INTELLIGENCE—

ANSWERED LETTERS

Thankful—Massage the legs and between meals and take a warm bath every day.

Not at this season of the year the skin is easily bleached. An application of lemon juice should do this.

Notes—Increase the amount of hair you have by improving the condition of your scalp. This may be sometimes accomplished through daily massaging of the scalp. A good tonic applied several times each week will also hasten the improvement.

Scrubbing the teeth with coarse salt is severe treatment and irritating to the gums. There are any number of good preparations on the market that will not only cleanse the teeth but will keep the gums healthy.

Hopeful—As the Pilocarpine tonic has done so much for you, the lack of response in that small spot could indicate the coming of your hair. This will not respond to any treatment. If this is so it will drop out as new hair grows, which should not take very long, since your whole head of hair is showing improvement.

Charity—Consult the doctor about this trouble. Temporary relief is often obtained by using apository made from anything that is sweet, such as stick candy. An enema of warm water is also a help.

N. L. J.—It is not an unusual thing for a girl to you to have a few pimples occasionally. Do not overtax your digestive system by eating be-

cause you will be improving the condition of your scalp. This may be sometimes accomplished through daily massaging of the scalp. A good tonic applied several times each week will also hasten the improvement.

They tell the tale, as Mr. Cabell says, of the late Gen. Horace Porter, what time he was manager of the Pullman company. One day he got into a car with an army officer who said that he had carried him from Jersey City to Long Branch had not been properly swept and dusted. General Porter waste-baited the letter; also the second, the third and the fourth. But the fifth was so violent that General Porter dictated the following reply:

"Sir: We have run the train off the track, burned the cars, shot the conductor, harassed the passengers and disturbed the line, stopping at this will be satisfactory, I remain, etc."

Colonel Breckinridge and Major Polkender, Kentucky gentlemen of old school, once sold something to us, using about their favorite beverage, but they disagreed as to what it might be. "Very fine though, sir," observed the colonel to the major. "But it has a foreign flavor."

"You ah right, sir; it has a foreign flavor," replied the major: "I should say, sir, it has an iron flavor, he added.

"You ah mistaken, sir; it has the flavor of leather," insisted the colonel. "When the hoghead from which their libation came was empty a tack with a leather top was found on the bottom of the receptacle."

Dear Mrs. Thompson: I am 19 years old and am attending high school. There is a young man here, and for the past year he has been very nice to me. He took me to the theater and dances and I enjoyed myself ever so much. I guess he loved me too, because he often told me I could tell by his actions.

This year his manner has changed and he acts like a "newcomer." Now he seems to shun me. He speaks to me, but I can see he likes another girl.

Don't you think I should be angry? Please don't forget him, Bess.

If you don't forget the young man, you will be very foolish, because it is evident he has forgotten you—except when you meet and he speaks. It is very untrue for school boys and girls to talk of love, because love at that age is rarely lasting. It is certainly too bad that the young man talked of his love for you, and he advised later that it was over, he vanished. Let him go, since you have no choice in the matter, and be hopeful that your next experience will be a happier one.

Dear Mrs. Thompson: I am a girl 18 years old and am going with a fellow 19. I love him dearly and don't know if he loves me or not.

I never go with any other fellow and broke up with all my girl friends. I don't know why, but I am very lonely. Before I met him he drank and now he wouldn't touch a drop. He has stopped swearing and he is always afraid that he is going to hurt my feelings. Do you think he really loves me and do you advise me to stick to him? UNDECIDED.

Yes, I think the man loves you and I would advise you to be loyal to him since he has made such an effort to become worthy of you.

"Anxious": You will find helpful suggestions regarding entertaining at this time of the year in the different women's magazines. There is not room in my column to describe enter-

DID PAIN DISTURB YOUR SLEEP?

THIS pain and torture of rheumatism can be quickly relieved by an application of Sloan's Liniment. It brings warmth, ease and comfort and lets you sleep soundly.

Always have a bottle handy and apply when you feel the first twinge. It penetrates without rubbing.

It's splendid to take the pain out of tired, aching muscles, sprains and strained stiff joints, and lame backs.

For forty years pain's enemy. Ask your neighbor.

At all druggists—35c, 70c, \$1.40.

Sloan's Liniment Pain's enemy.

A FAIR-WEATHER SWEETHEART

Here the barker used to bawl:

"Ho! Ho! Ho! The scenic railway

the scenic railway. Greatest ride

in the world. Ho, boy! Bring the

girls in here. Hold 'em tight on the

curves. Kiss 'em in the magic grotto.

They all like it. The scenic rail-

way. Step right up. Heehee

He answered: "I wouldn't care if

I never opened again."

"You foolish of you!" she declared</

RE-ELECT FOSTER FIELD SECRETARY

News for Farmers

Farm Bureau Official Information

DEFINITE PROGRAM JAN. 27 TO BE BIG FOR AIDING FARMS DAY FOR FARMERS

Secretary of American Farm Bureau Issues Policy Statement.

In order that I may properly convey my message to you, I think we should relate briefly on what the Farm Bureau is and how it is supposed to function, stated Secretary Cordvalle in his address to the Illinois Agricultural Association recently. The object of the Farm Bureau shall be to create a county-wide organization to advance and improve the agriculture of the county; to cooperate with the State College of Agriculture and the U. S. Department of Agriculture; to develop a definite program of work which will bring about a country better economic, social and educational condition, so as to make farming more profitable and country life more attractive.

Any statement that the Farm Bureau movement is losing members is unequivocally false. The facts are that the American Farm Bureau Federation is gaining at the rate of 20,000 members per month.

Strong Local Units.

Transcending all the other work of the Farm Bureau is the establishment of strong local units of the organization in every community of the land.

Without strong local units composed of men and women doing the work of the farm, and interested in better farm practices, we become sounding brass and rattling cymbals.

Where we are losing members, those people are disassociated, where folks do not think that they are getting value received, there you will find a local unit that is not functioning properly. Something is wrong, and it is up to the members themselves to analyze the situation and find out what it is. In most cases you will find that it is due to the lack of a definite program of work.

Programs of work not well adapted to local conditions. No one can work out this program for you. The farmer-members must do that themselves.

Definite Program.

What are you doing? That is the question everybody asks. If you have a definite program of work, an answer can be given, and if you are good workers the answer will be satisfactory.

A Farm Bureau is a good deal like a church. A church is not efficient unless every member in it finds a job which will bring him in just to do his best to do that just for the promise of going to heaven. Find your job. See that every other farm Bureau member finds his job in the local organization. Too many people join the Farm Bureau and then sit back and wait to see what they get out of it. It is an off-side view. Let us join the Farm Bureau in order to see how much we can contribute to the work we can have in bringing economic and social justice to the women's organization.

National Conference.

James R. Howell, president of the American Farm Bureau Federation, Dr. E. B. Gardner, vice president, and the members of the executive committee will represent the national farmers organization at President Harding's Agricultural Conference which opens in Washington, D. C. January 23rd. In accordance with the general outline of the purpose of the conference as given by Secretary Wallace, the farm bureau officials have mapped out every definite program for presentation. The program features of the farm bureau proposal will include a forceful insistence upon early enactment of laws clearly defining the rights of farmers to market their products cooperatively.

It will be urged that all appointments of Federal board and committees be made so that the interests of agriculture shall be protected and conserved.

Demands of Bureau.

For transportation relief the bureau will present to the conference the transportation policy adopted at the annual meeting which is as follows:

1. Immediate reductions in freight rates.
2. All savings in operating costs to be at once reflected in further rate reductions until the entire increase of Aug. 29, 1920 is wiped out.
3. Repeal or amendment of the Cummins-Esch Law so as to abrogate the guarantee clause, restore to the states jurisdiction in intrastate rates, vitalize the Railroad Labor Board and coordinate wage-making powers with the rate-making powers of the Interstate Commerce Commission.
4. Repeal or amendment of the Adamson Law, so as to nullify the National Agreements.

It is expected that the bureaus will urge the development of the Muscle Shoals Nitrate Water project. Other important points to be urged are the condemnation of the barge bunks. Plus, the necessity for the enforcement of Truth-in-Fabric legislation, and the need for a law preventing the manufacture and sale of filled milk.

CUTTING TREES COSTS

FRAT MEMBERS 330

Madison.—Cutting two valuable spruce trees on the property of Magnus Swenson, president of the Norwegian-American Steamship Line, in order to decorate for a Christmas dance, cost members of the Phi Delta Theta fraternity \$1,000. The money was made Tuesday. The money will be used, Mr. Swenson says, for protecting the natural beauties of Madison.

AUDDRESES SHOE MAKERS.

By ASSOCIATED PRESS.

New York.—Irregularity of piece rates and the uneven flow of work are the chief ailments of the shoe industry, Sanford E. Thompson, consulting engineer in industrial management Tuesday told members of the National Boot and Shoe Manufacturers' association.

Was a "Bear Cat."

"My wife was never an angel, but after five years of liver and stomach trouble she became a 'bear cat.' No doctor or medicine helped her and we thought there was no help for her. One grocer told me of May's Wonderful Remedy, which had helped him for some trouble, so I brought home a bottle, but she promptly threw it out. I got it back and after a week coaxed her into taking it. She is now enjoying the best of health and disposition. It is a simple, harmless preparation and not subject to any side actions from the intestinal tract and relieves the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convalesce or money refunded."

The order was based on an investigation of rates made Nov. 4, 1921, after complaint had been made by the city on Oct. 24. Reduced costs of production are given as the reason for lower prices of gas.

Green Bay Gas Rates Reduced

By ASSOCIATED PRESS.

Madison.—Gas rates charged by the Wisconsin Public Service company at Green Bay were ordered reduced Monday by the utility commission. The cut amounts to approximately 10 percent over present charges and will go into effect with the next meter reading following the order.

Under the revised schedule the first 5,000 cubic feet of gas will cost \$1.50, reduced from the old charge of \$1.65; the next 5,000 feet will cost \$1.45, reduced from \$1.60; the next 5,000 cubic feet will cost \$1.35, reduced from \$1.50; and the next 5,000 cubic feet, \$1.25, reduced from \$1.45.

Lydia E. Pinkham's Vegetable Compound has helped to bring great happiness to many families by restoring women to health. Often the children home is due to a run down condition of the wife, which may be helped by Lydia E. Pinkham's Vegetable Compound. It brought health and happiness into the home of Mrs. Johnson. Why not to yours?

Green County Holstein Ass'n. Names Board

The following officers have been elected for the Green county Holstein Breeders' association: President, Ira Pierce; first vice president, Fred Colcord; second vice president, Fred Colcord; secretary, T. A. Hessey; treasurer, Henry Haberman; director, J. S. Roderick; Ira Colcord; sales committee, T. A. Hessey, J. M. Roderick, Edward Walker.

Clinton

Clinton—The Missionary meeting of the Presbyterian church at Dr. and Mrs. A. S. Parker's was well attended. The noon luncheon was excellent. The dinner at night was charge of Mrs. E. L. Beloit, who greatly enjoyed. Responses to the Roll Call appropriate to the New Year were given.—Little Leland Foley, son of Mr. and Mrs. Eugene Foley has been quite sick for the past week.—Mrs. Nettie Manley is visiting her brother, H. H. Hughes and wife, Elsie Christensen, little daughter of the minister, is full grown, chair突破ed both bones in her arms. Miss Irene Monson, teacher in Beloit was the guest of her aunt and uncle, Mr. and Mrs. Fred Leda from Friday until Sunday evening. She was accompanied by her friend, Henriette Lee, also a Beloit teacher.—Miss Vie Montgomery has been entertaining an Elkhorn friend over Sunday. The Farm Bureau desires to put over another boost to "make Rock County first, and the livestock men will be called into conference on effective organization.

The agricultural Farm Bureau banquet will be planned for another date, but because of a swine sale that day, County Agent R. T. Glassco and Secretary C. E. Culver moved the date along to the 27th. Theodore Macklin will speak. There will be only a limited speaking program following the banquet at noon.

During the afternoon all livestock breeders will be called together by Mr. Parker, president of the Wisconsin Livestock Association. Sales promotion, better organization, more effective methods and the building of the livestock pavilion are to be considered. Farmers, whether Farm Bureau members or not, will be urged to attend for the purpose of promoting Rock county.

There are four active breed associations in the county, representing the Holstein, Shorthorn and Guernsey cattle, and Duroc Jersey swine. There are sufficient breeders of Poland and China and Chester White swine to have an effective organization or at least one that is very desirable.

There are other breeders of cattle, including the Brown Swiss, Jersey, Durham and beef types interested in any county sales program. Good work has been done through the active breed associations and it is desired to bring all breeders in for consideration of county plans for bettering the livestock market in Rock county.

It is the plan of the pavilion committee to have every farmer interested in the building who has any stock to sell, whether it is sheep, swine, cattle or horses. And there is no intention to attempt to unload any financing schemes on the breeders for any project. The object of the meeting is for county promotion of livestock stock.

The Livestock and Farm Bureau meeting is to be combined into one big farm booster session for all agriculture interests in Rock county.

Wisconsin's allotment of picric acid—the war time government explosive which was salvaged and given out to farmers for blasting work—has all been used. No other picric acid is now available, according to John Swenhart, and clearing specialists at Madison.

"We expect a material reduction in the cost of dynamite," writes the Madison specialist. "Upper Wisconsin farmers cleared more than 100,000 acres of land with 3,000,000 pounds of explosives, which means that picric acid cost per acre averages 30 pounds or less than 35 at commercial dynamite prices."

Several blasting demonstrations will be held this year in Rock county by Swenhart to show methods of clearing stumps and digging ditches.

"Upper Wisconsin farmers cleared more than 100,000 acres of land with 3,000,000 pounds of explosives, which means that picric acid cost per acre averages 30 pounds or less than 35 at commercial dynamite prices."

Several blasting demonstrations will be held this year in Rock county by Swenhart to show methods of clearing stumps and digging ditches.

Wisconsin's allotment of picric acid—the war time government explosive which was salvaged and given out to farmers for blasting work—has all been used. No other picric acid is now available, according to John Swenhart, and clearing specialists at Madison.

"We expect a material reduction in the cost of dynamite," writes the Madison specialist. "Upper Wisconsin farmers cleared more than 100,000 acres of land with 3,000,000 pounds of explosives, which means that picric acid cost per acre averages 30 pounds or less than 35 at commercial dynamite prices."
